Professional Summary

Software Engineer with 2+ years of experience in backend systems, API integrations, and AI-powered tooling. Track record of measurable impact — reduced infrastructure costs by 98% through an embedding-based classification pipeline. Comfortable working across data pipelines and LLM integrations.

Technical Skills

- **Languages:** C++, C#, JavaScript, Python
- **Frameworks/Libraries:** .NET / ASP.NET Core, React, Node.js
- **Databases:** MySQL, MongoDB, DynamoDB
- **Cloud & Tools:** AWS (S3, SQS, SNS, EventBridge), Pinecone

Experience

Optmyzr, Hyderabad June 2025 - Present

Software Development Engineer - 1

- Designed and integrated **Model Context Protocol (MCP)** as a modular layer within the existing chatbot platform, enabling agentic workflows and external tool execution across multiple LLMs including **Claude and ChatGPT**.
- Designed and implemented an embedding-based classification system using Pinecone and C#, automating website content categorization and reducing processing costs by ~98% (**\$50 → \$1/month**) while improving overall efficiency.
- Built a **seasonal decomposition** pipeline with Python-based models and caching strategies, significantly improving processing performance on large-scale ad account datasets.

Optmyzr, Hyderabad

Apr 2024 – May 2025

Software Development Engineer Intern

- Reduced data tool loading time by **60–70%** by replacing slow API-fetched retrieval with DuckDB + Parquet, significantly improving filtering performance on large Meta and Google Ads datasets.
- Integrated **Meta and LinkedIn Ads APIs**, resolving existing reliability issues and delivering new features to improve data sync accuracy and reduce manual intervention for account managers.

GoFinx (BazaarX.CO)

May 2023 – Aug 2023

Freelance Web Developer

- Developed custom WordPress and web solutions for clients, building responsive interfaces and tailored themes/plugins to meet business requirements.

Projects

Visualio AI | GitHub | Live

MERN Stack

- Built a platform that converts text into high-quality videos using OpenAI APIs, automatically mapping scripts to relevant stock footage for seamless video generation.

EventCrew | GitHub | Live

React Native & Expo

- EventCrew is an all-in-one app to create and manage events, hire vendors, and coordinate tasks in one place. Users can find experts like DJs and photographers, explore nearby events, or join as crew. With simple planning and built-in collaboration, EventCrew makes event management fast, organized, and effortless.

Tutotube | GitHub | Live

MERN Stack

- QA chatbot for YouTube videos using semantic search. Users ask natural language questions; the system retrieves the most relevant answer using vector embeddings and OpenAI completions.
